Mobile emergency command vehicles will be on display.

Who are SKYWARN storm spotters?

Amateur radio operators make up the backbone of the SKYWARN spotter network. In some communities and counties, law enforcement and fire officials serve effectively as storm spotters. Public utilities workers, electric and telephone crews, and city/county employees may also serve as storm spotters, along with interested members of the general public.

This is an excellent opportunity to have your law enforcement, fire, dispatchers, city/county workers, school employees, Community Emergency Response Teams, (CERT) and interested citizens trained in how to spot severe weather in your community.
